- Offers superb quality audio and video performance
- Dolby Digital™ and DTS™ certification
- Progressive Scan
- High-quality metal loader mechanism

The UNIDISK 1.1 player from Linn represents a new generation of source product. This “true convergence” product unites all of the major quality music and video formats currently available and allows Linn to offer total entertainment systems that deliver the best sound quality for music, cinema and multi-room.

The key to the UNIDISK 1.1 player is simplicity. The product, which is based around Linn's new SILVER DISK ENGINE™ technology, offers market leading performance coupled with the convenience and flexibility of a multi-format player. Unlike some other manufacturers who have felt the need to invest in one emerging technology or format over another, Linn has always sought to satisfy the most demanding customers through the development of a universal solution.

The UNIDISK 1.1 player has been engineered to offer compelling levels of audio and video performance, regardless of format. Indeed, the performance of the product is such that it will immediately enrich and improve almost any two or multi-channel audio system, distributed multi-room network, home theatre installation or multi-source home entertainment system. From the purest audiophile to the Saturday night movie enthusiast, the UNIDISK 1.1 player represents a high-quality audio and video solution capable of meeting every need.

UNIDISK 1.1 PLAYER

SPECIFICATION

A “true convergence” multi-format disc player
